

The agent sees five symbolic channels — no colour, no pixels

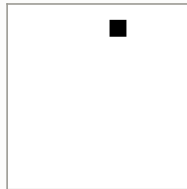

rendered for humans only

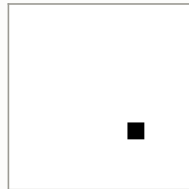

ch0 walls

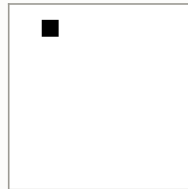

ch1 agent

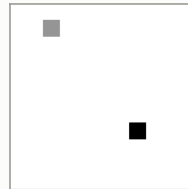

ch2 feature 0

ch3 feature 1

ch4 value

blue = agent · red = feature 0 (value 1.0, 11 steps away) · green = feature 1 (value 0.5, 4 steps away) → optimal is feature 0, by value $- 0.05 \times \text{distance}$
