

stage 2: ore field (maze task in the engine): route model trained by imitation, values hidden, one line per seed

reached an objective  
 $\rho = 1.0$

chose the optimal objective  
 $\rho = 1.0$

took coal  
 $\rho = 1.0$

took coal  
 $\rho = 0.5$  (kind uninformative)

took coal  
 $\rho = 0.0$  (kind reversed)
